# Technical Information Bulk Ice Control Salt

### DESCRIPTION:

Bulk Ice Control Salt is a coarse screened, translucent to white crystalline solid obtained from domal salt deposits in Louisiana by physical mining. The salt is exploited by drilling and blasting with explosives in a manner similar to that used in other types of mineral mining. The mined salt is then crushed, screened and hoisted to the surface where it is stockpiled awaiting distribution as a highway deicing product.

### COMPLIANCE:

Bulk Ice Control Salt is not approved for human or animal consumption. It is intended for use only as a chemical deicer on roadways and thoroughfares. This salt complies fully with ASTM Specification D 632-99 Type 1, Grade 1.

### ADDITIVES:

Bulk Ice Control Salt may contain Yellow Prussiate of Soda, which is added to improve caking resistance.

### APPLICATIONS:

Bulk Ice Control Salt is intended for use as an ice and snow removal agent on highways and other roadways.

### PACKAGING AND SHIPPING:

Bulk Ice Control Salt is available only in bulk form. Bulk quantities are shipped by rail or truck.

Tests of rock salt delivered under the contract may be made from time to time and any which does not conform to the specifications will be returned to the contractor at his expense. If the vendor cannot supply salt meeting these specifications in a reasonable period of time, the entity will purchase the salt elsewhere on the open market and charge the vendor in non-compliance for the difference in price.

Salt shall be delivered as needed in motor transport loads. All salt deliveries shall be made as agreed upon by each entity with the successful vendor. Salt shall not be unloaded on the ground or outside of a salt shed without specific permission. Twenty-four (24) hour notice of delivery must be made to dispatcher or contact person at telephone number listed on attached listing.

All deliveries of sodium chloride shall include:

- 1) Adequate equipment to stock salt, such as conveyor, blower, slinger, etc., as needed for the particular installations utilized at the delivery destination.
- 2) If the type of unloader or the maximum height to be unloaded is unknown it will be the responsibility of the vendor to contact those participating for the information.

A deduction equal to that assessed when unloading equipment is used will be deducted from invoice when said equipment is requested by the entity, but not used in the placement of sodium chloride.

Vendors will be responsible for any damage caused to equipment due to foreign materials in the salt. Vendors will also be responsible for any damage to salt storage building resulting from the improper piling of salt, and or caked salt (including equipment and labor costs).
